

HOW TO USE

1

Make sure to run the cable around the bike frame (at minimum), and both wheels if possible.

2

Attach cable around a bicycle rack, pole, handrail, or other non-movable object that the cable can not be slipped over.

3

Cable locks are great deterrents for quick theft, but do not offer complete safety.

4

Try to lock your bicycle in a well-lit location that has some foot traffic.
